If you're teaching an introductory science education course in a college or university, Readings in Science Methods, K - 8, with its blend of theory, research, and examples of best practices, can serve as your only text, your primary text, or a supplemental text. If you're a preservice teacher, you'll want a copy for its insights into how you can effectively teach science. If you're a practicing teacher, this book will refresh what you already know, and could lead you into new and fruitful approaches. and if you're an administrator, this is the perfect professional development tool as a reference for your staff. The book is a generously sized compendium of articles drawn from NSTA's middle and elementary level journals Science Scope and Science and Children. Editor Eric Brunzell teaches his methods courses using only the articles, the "voice of the classroom teacher," he says. Brunzell has chosen the best journal articles, tested each in the classroom, and organized them into seven sections, each supplemented with its own insightful introduction and "action steps:" The Nature of Science and Science Inquiry; Teaching Science; Science for All; Science-Teaching Toolbox; Teaching Life and Environmental Science; Teaching Physical Science; and Teaching Earth and Space Science.

This book offers 101 passive programming ideas that are extendable, adaptable, customizable, and above all, stealable—so your passive programming never runs dry. Passive programming is a cheap, quick, fun way to make all library customers feel like part of the community. It can support reading initiatives, foster family engagement, encourage visit frequency, and coax interaction out of library lurkers—while barely making a dent in your programming budget. Passive programming can be targeted at children, adults, seniors, or teens; used to augment existing programs; and executed in places where staff-led programming can't reach. It can be light-footed and spontaneous, easily deployed to reflect and respond to current news, media, library events, and even the weather. But even passive programming pros run out of ideas sometimes, and when that happens, they want a fresh, funny source of inspiration. Make programming less intimidating Get the most bang for your buck from whatever resources you have available Make diverse customers feel welcome and seen Encourage repeat/regular library visits Boost your programming statistics

The nearly two hundred activities in this teaching guide for language arts in the junior high and middle school are arranged in five sections: studying language, communicating orally, reading and reading literature, writing, and listening and viewing. Each section opens with a list of activities, a brief introductory statement, and suggested reading. Sections are subdivided to help teachers locate activities related to particular curriculum units or areas of special interest. All activities were adapted to fit a unified format: purpose, preparation, and presentation. Approximately half of the activities contain material that should be distributed to students and these material sheets are printed separately for ease of reproduction and are presented in a special section. The appendix contains articles on parental involvement in the language arts program and on a two-year program in junior high school writing. (MKM)
